GstValidate a good friend for debugging

SAMSUNG
Open Source Group
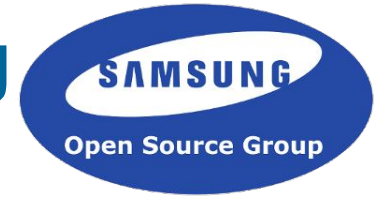

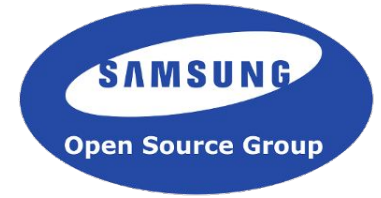

- Integration testing framework for GStreamer

- Usable in the exact same way as gst-launch-1.0

- Inherently useful to detect issues in elements

- Allows reproducing bugs in a simple way

One step further

- Dedicated reports for common issues

  - Not negotiated Errors described in details

  - More to come, please give ideas!

- Gathering more information on failures

  - Stacktrace reported for critical issues

  - Pipeline is dumped on critical issues
